

# Corvus Signal<sup>TM</sup>

Cut through the noise and stay ahead of emerging threats with the only risk prevention solution shown to reduce cyber risk

## Your challenge

New cyber threats emerge by the hour. With a limited budget and thousands of potential solutions, you need to prioritize what actions truly impact security and know your spending has strong ROI.

## Our solution

Stay ahead of emerging threats and improve security with Corvus Signal, the only risk prevention solution shown to reduce the impact of cyber incidents by 20% through risk insights, advisory services, and on-demand tools. It is available at no cost for Corvus policyholders.

## Why it works

By working with thousands of policyholders we found that a partnership-based approach combining personalized risk insights and advisory services enabled by an online dashboard is the most effective way to curb cyber risk. Corvus has an in-house team of cybersecurity experts and expansive risk data to guide you.

## Benefits by the numbers

**20%**  
lower

frequency and cost of cyber breaches

**\$86k**

estimated value in services available at no cost to Corvus policyholders

**15.5**  
days

average head start before alerted vulnerabilities are exploited by threat actors

**3x**

faster patching, with cyber alerts sent the same day as discovery

**“We have significantly reduced our vulnerability footprint since we engaged with Corvus. Corvus’s Risk Dashboard provides a great snapshot of insightful information for securing our network.”**

Director of IT,  
mid-sized healthcare services company

## Risk Advisory

*On-call expert guidance to prioritize your security efforts and investments.*

### Introductory call

Our partnership starts at the very beginning of your policy period. Introductory calls provide a deeper understanding of your policy benefits and your IT environment.

### Cyber Advice

Guidance, on your terms. Our cyber experts are ready to help — be it by email, call, or through your Risk Dashboard.

### Optimized Spend

Prioritize where you spend (and get the best bang for your buck) with investment recommendations and a marketplace of pre-vetted vendors.

### Renewal Prep

No surprises! We'll work with your team and your broker well in advance to get you prepared for policy renewal.

## Risk Insights

*Threat monitoring and alerting personalized for your organization.*

### Threat Intelligence

Through dark web monitoring, we catch new threats — fast. We provide a 15 day head-start (on average) to patch systems before widespread active exploitation begins.

### Cyber Alerts

Personalized threat alerts are delivered directly to your inbox. Your time is valuable; we only send alerts for 12% of threats we research, and 82% are later exploited.

### Third-party reports

Upon request, we can share third-party risk reports for vendors and partners.

## Risk Dashboard

*Access the latest advice and security recommendations, all in one place.*

### Recommendations

Your Risk Dashboard provides visibility and control over your security priorities, enabling you to prioritize your efforts and focus on the risks that matter most.

### Vendor Marketplace

Search our database of pre-vetted security vendors, including some with discounts for Corvus policyholders.

## Corvus Black Services

**Incident Response Plan Review with experts from the Corvus team**

**Virtual Incident Response Tabletop — two hour exercise**
