

Corvus[®] is partnering with healthcare entities to combat cyber risk

With lives on the line, the healthcare sector has no room for downtime. Plus, the abundance of sensitive PHI creates a desirable target for cybercriminals. The frequency of ransomware attacks on healthcare entities increased 141.66% between Q1 2021 and Q1 2023.

The bright side: Despite the current threat landscape, we're offering broad policy language, competitive terms, and endorsements **made** with healthcare in mind.

Coverage Enhancements

HIPAA Corrective Action Plan

Coverage extends to cover the costs to recertify the insured's HIPAA compliance status as well as to create and implement a HIPAA Corrective Action Plan.

Expanded Definition of Computer Systems

Coverage extends to systems specifically used by the healthcare industry: medical equipment used in the course of care that is connected to the internet, Electronic Medical Record (EMR), patient Customer Resource Management (CRM), Picture Archiving and Communication System (PACS).

Preventive Shutdown

Coverage expands the Business Interruption and Contingent Business Interruption insuring agreements to situations where the Insured's or Outsource Service Provider's system may need to be shutdown to mitigate, reduce, or avoid further damage or interruption in service caused by a computer crime or computer attack.

Outsourced Service Providers

Coverage expands the definition of Outsourced Service Provider to include Electronic Health Record Systems (EHR) providers, which are commonly used for accessing patient files electronically.
