

# Adaptive protection for a complete cyber strategy

Finally – a smarter cyber policy that's tailored to your team's cyber defense strategy, regardless of technical maturity.

## 1

### Review Quotes

You are here. Start with reviewing the policy coverage options provided by your broker.

## 2

### Select Coverage

Choose between Standard or Enhanced. Save 20% by using our EDR + 24/7 SOC platform.

## 3

### Fill in your Gaps

We include third-party validated software to fill any gaps in your security posture.

“

But I have a mature cyber security strategy. Do I need extra security software?

That's music to our ears. We're thrilled to work with teams (and their existing tools) that properly manage their own cyber risk.

We have great news – you don't have to install anything at all. However, you can save 20% and add supplemental security by using our Threat Monitoring EDR and 24/7 SOC Platform.

“

I'm a small business – what about me? I don't have any cyber security protection at all!

We have you covered too, small business owners. We include comprehensive insurance and software with all of our policies.

Our easy-to-install cyber software includes data backups, ransomware remediation, active threat monitoring (EDR), secure remote access connections, and more!

#### 24/7 Customer & SOC Cyber Support

Get quicker incident response and help from our experts anytime.

#### Rapid Bulk Installation

We'll provide MSI or PKG bulk installers to minimize your team's onboarding efforts.

#### Customized Security Tools

Use as many of our cyber security tools as you need. We're tailored to fit you.

#### Exclusive Enhanced Coverages

Enjoy exclusive policy coverages like the lowest extortion loss retention – only \$500.

**Insurance fused with security software for a complete defense.**
